

Md. Sheaf Hassan

Full-Stack Web Developer

Email | [GitHub](#) | [LinkedIn](#) | [Portfolio](#) | +8801719541209

Summary

Full-Stack Web Developer skilled in React, JavaScript, TypeScript, Node.js, Express.js, MongoDB, PostgreSQL, and Prisma. Experienced in building REST APIs, authentication, role-based systems, payment integration, responsive websites, and database-driven applications.

Experience

Trainee Network Engineer

17 August 2025 – 16 September 2025

Bangladesh Telecommunications Company Limited (BTCL)

Dinajpur, Bangladesh

- Successfully completed an internship program as a Trainee Network Engineer at BTCL, Dinajpur.
- Gained practical knowledge of networking concepts, LAN/WAN, IP addressing, routing, and switching.
- Observed and assisted with network monitoring, troubleshooting, and basic connectivity issues.
- Learned about network infrastructure, telecommunications systems, and common networking equipment.
- Developed practical understanding of network maintenance, fault identification, and technical support procedures.

Technical Skills

Programming Languages: C, C++, JavaScript (ES6+), TypeScript, Python, Bash.

Frontend UI Frameworks: React.js, Next.js, Tailwind CSS, daisyUI, Shadcn, React Router, React Hook Form.

Backend API Technologies: Node.js, Express.js, REST API, JWT, Firebase Authentication.

Database and ORMs: MongoDB, PostgreSQL, Prisma, Neon.

Tools: Git, GitHub, Vercel, Inngest, Stripe, ImgBB, VS Code.

Other: Responsive Design, Authentication, Authorization, CRUD, RESTful APIs, Role-Based Access Control.

Projects

Instant Grocery Delivery

[Live Demo](#) | [GitHub](#)

React JS, Tailwind CSS, TypeScript, Node.js, Express.js, PostgreSQL (Neon Database), Prisma, Inngest

- Developed a full-stack grocery delivery platform with a responsive user interface and end-to-end order management.
- Implemented role-based authentication for Admin, User, and Delivery Partner with dedicated access and features.
- Built an admin dashboard for managing products, orders, and delivery partners, along with delivery partner dashboards.
- Implemented real-time order tracking and live location sharing for delivery partners.
- Integrated automated emails, delivery partner auto-assignment, and background processing with Inngest.
- Deployed the application using Vercel with production-ready backend and database integration.
- Managed source code and project development using Git and GitHub.

Employee Management System

[Live Demo](#) | [GitHub](#)

React JS, Tailwind CSS, JavaScript, Node.js, Express.js, MongoDB, Inngest

- Developed a full-stack employee management platform with secure role-based access for Admin and Employee users.
- Implemented employee management, attendance, leave management, and payslip features.
- Developed REST APIs using Node.js and Express.js with MongoDB database integration.
- Implemented background jobs and scheduled tasks using Inngest for automated system operations.
- Deployed the application using Vercel with production-ready backend and database integration.
- Managed source code and project development using Git and GitHub.

Education

B.Sc. Engineering in Electronics and Communication Engineering

Dinajpur, Bangladesh

Hajee Mohammad Danesh Science and Technology University

Jan 2020 - October 2025

Additional Strengths

- Hands-on experience developing and deploying full-stack web applications.
- Strong interest in modern frontend and backend technologies.
- Proficient in Git/GitHub for version control and collaborative development.
- Comfortable working with SQL and NoSQL databases and database management.
- Strong willingness to learn new technologies and solve real-world problems.
- Good communication, teamwork, and time-management skills.
